

WFAU: VO Needs

- Maintenance of existing systems
 - Secure DSA – for UKIDSS and VISTA access
 - Registry – listing our services so they can be found by VO users (including harvesting by US registries)
 - Topcat – heavily used by WSA community
- Enhancements
 - ADQL improvements – Database cross querying
 - MyDB Functionality – personal user databases within VOSpace
 - Server side AstroRuntime for server apps
 - Secure SIAP
- New systems
 - Spatial coverage in registry
 - Table Access Protocol (TAP) implementation
